

Timber Frames

Timber frame construction has been a long-established way of building homes, not only in the UK but across the world and forms part of today's Modern Methods of Construction (MMC).

Merronbrook, Leading the Way in Timber Engineered Products

For over half a century, Merronbrook has been at the forefront of supplying timber engineered products to developers and contractors across the Southeast of England. Our extensive experience and dedication to quality has made us a trusted partner in the construction industry.

Merronbrook's Timber Frame Kit Solution

We offer an open panel system, using a 140mm CLS stud, insulated with a rigid insulation board. This is then clad externally with 9mm OSB ply, with a reflector shield breather paper. Coupled with our easi-joist[®], and trussed rafters, gives us our complete timber frame kit solution, offered on a supply and installation basis.

Timber Frames USPs

Timber frame is one of the fastest growing ways to construct in the UK today. It's USPs are unparalleled against traditional build methods:

- Speed of build
- Sustainable properties
- Reduced carbon footprint
- Cost effectiveness
- Versatility in various sectors

Why Merronbrook?

At Merronbrook, we are committed to innovation, quality, and customer satisfaction. Our dedicated team works closely with clients to ensure that every project is completed to the highest standards.
